USE CASE 7: ADJUST THE INTENSITY

The user presses either the INT up or down buttons to either
decrement or increment the session's intensity value depending on
the button they have pressed. The first diagram shows the
sequence diagram for pressing the up button, while the one below
shows the diagram of pressing the down button

User	upButton : QPushButton	w:MainWindow	record:Record	progressBar:QProgressBar

released()
handleUpButton()
value
setValue(value+1)
incrementIntensity()

User	downButton : QPushButton	w:MainWindow	record:Record	progressBar:QProgressBar

released()
handleDownButton()
value
setValue(value-1)
decrementIntensity()
